Featured Brands & Product

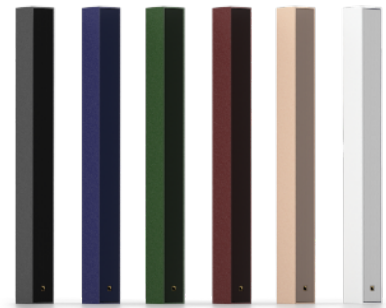

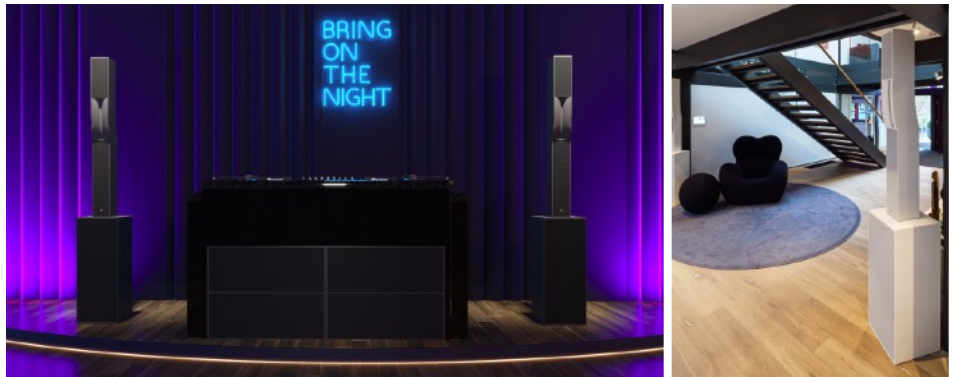

Bang & Olufsen – Beosound Shape

Beosound Shape is a wall-mounted wireless speaker system for design conscious music lovers – delivering immersive sound staging, a customizable design and integrated noise dampers for improved room acoustics. Based on a modular tile concept, Beosound Shape is designed to provide ultimate creative freedom. Each tile serves a function as either speaker, amplifier or acoustic damper and can be pieced together in endless combinations. Living room, hotel lobby or restaurant – whatever the setting, we will let you define the size, colors and even the sound performance to match.

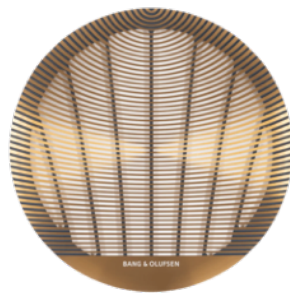

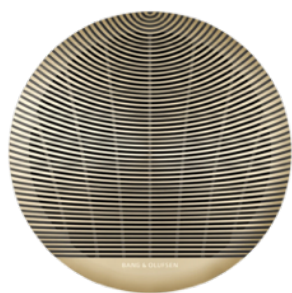

L-Acoustics – Residential

L-Acoustics brings its renowned concert-grade sound to residential spaces through dedicated Home & Yacht solutions. Compact models like the X4i in-wall/in-ceiling coaxial speakers, X8i, and powerful subwoofers (Syva Low, SB series) integrate discreetly into home theaters, media rooms, or whole-house systems. They deliver exceptional clarity, high dynamics, low distortion, and immersive audio—perfect for stereo music, multichannel surround, or advanced L-ISA Hyperreal setups—turning luxury homes into reference-level listening environments, expertly installed by certified integrators. A selection of custom finishes is thoughtfully available, allowing the speakers to be tailored in perfect harmony with your home's distinctive style and palette.

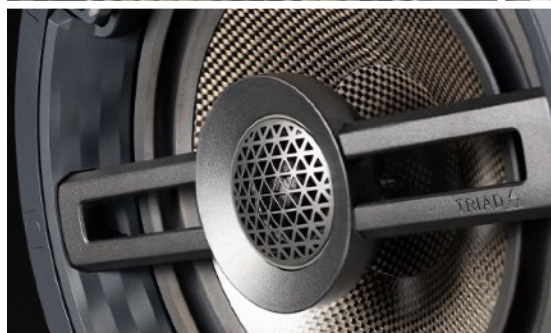

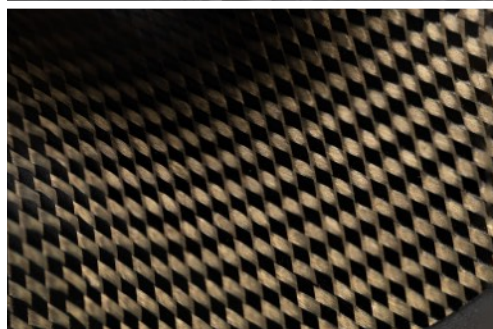

Bang & Olufsen - Celestial

The Celestial in-ceiling speakers combine great sound performance with flexibility and simple installation and the ability to match even the most progressive interior design. The Celestial speaker range is designed with solutions that can give you discrete background music listening, high performance listening and an involving home theater experience. Designed with exceptional versatility, this speaker excels in both interior living spaces and exterior settings, delivering uncompromising audio elegance wherever sophistication calls.

Triad - PDX Series 5

The Triad PDX Series 5 in-wall and in-ceiling speakers deliver exceptional, high-fidelity sound that transforms any room into a captivating listening environment. Crafted with premium materials like carbon fiber woofers, Kevlar reinforcements, and Teteron tweeters, along with precision dual voice coils and top-tier crossover components, they produce remarkably clear, detailed, and balanced audio with smooth frequency response and impressive dynamics. Whether you're enjoying music, movies, or immersive home theater—including seamless timbre-matched integration across the system—these speakers offer outstanding clarity, natural tonal accuracy, and a wide, engaging soundstage that brings recordings to life with stunning realism and depth. Discreetly blending into your space with ultra-thin, paintable grilles, the PDX Series 5 lets the extraordinary performance shine while remaining visually unobtrusive.

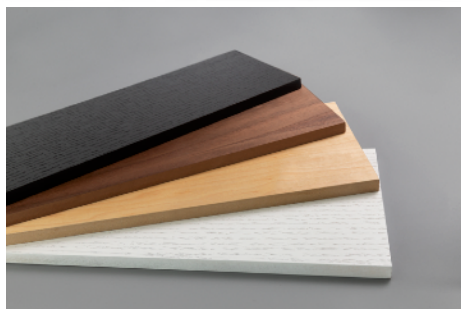

Bang & Olufsen – Beosound Theater

Beosound Theatre doesn't just lead from the front. Twelve custom drivers direct sound above, below and to the sides of your screen, creating a room-filling soundscape that immerses you in the moment. Dolby Atmos allows for true surround sound experiences, and a coaxial centre channel ensures crisp and clear speech. You won't miss a word or whisper. This soundbar offers complete customization, allowing it to be tailored with exquisite precision to your personal vision.

Triad – Soundbar

The Triad TS-PSB36 is a premium custom-length 3.0 passive soundbar that delivers stunning, theater-quality sound with powerful 6.5-inch woofers and precise three-channel performance—rich dynamics, crystal-clear dialogue, and deep bass that transforms movies, music, and TV viewing. Expertly crafted to your exact TV width for a flawless, integrated fit, it's finished in any color or luxurious wood veneer of your choice, blending beautifully into your space while remaining a striking design statement. Hand-built in the USA, the TS-PSB36 turns ordinary TV audio into an extraordinary, room-filling experience.

Bang & Olufsen – Beolab 90

Bang & Olufsen Beolab 90 speakers represent the pinnacle of Danish luxury audio—a stunning fusion of art and engineering. These iconic floorstanders deliver breathtaking performance with 18 premium drivers per speaker and 8,200 watts of power, offering extraordinary clarity, deep, controlled bass, and a vast, three-dimensional soundstage. Featuring intelligent Beam Width and Beam Direction Control plus Active Room Compensation, they adapt perfectly to any room and listening position, ensuring consistent, reference-grade sound with minimal reflections. Crafted from premium aluminum and oak in elegant finishes, the Beolab 90 is as visually commanding as it is sonically masterful—pure high-end excellence for the most discerning listener.

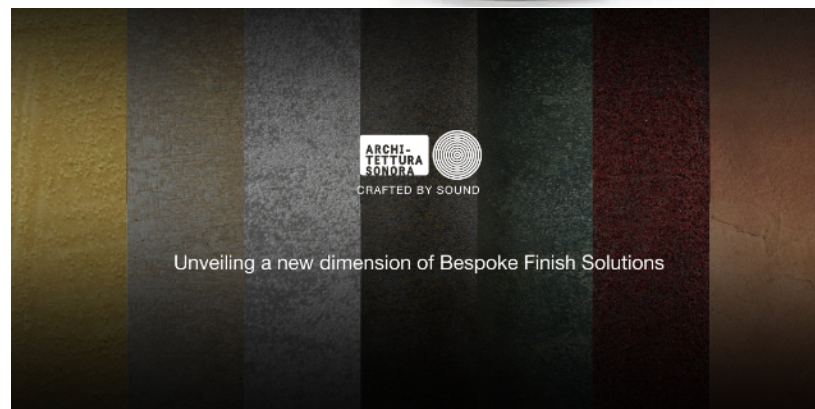

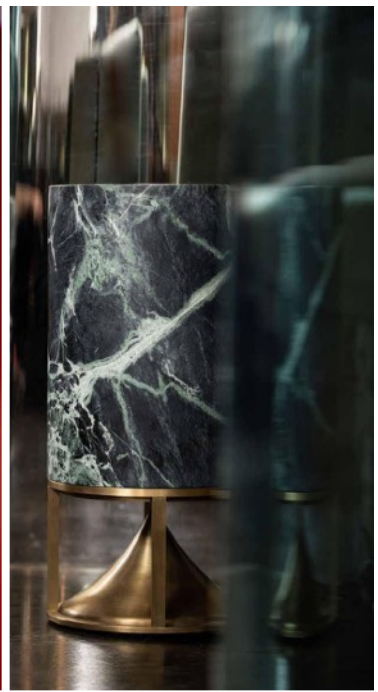

Waterfall Audio

Waterfall Audio speakers redefine high-end residential audio with their breathtaking glass enclosures, handcrafted in Provence, France, transforming each piece into a true work of art that blends seamlessly into any interior. Using premium glass and aluminum with exclusive JetStream technology, these speakers deliver extraordinary natural sound reproduction—crystal-clear, detailed, and balanced across the spectrum, with open soundstages, precise imaging, and surprising depth that captivates whether for music or immersive home cinema. Models like the elegant Niagara XT series, compact Iguascu XT floorstanders, and versatile on-wall or in-wall options offer timeless transparency and sophistication, fitting effortlessly into modern, classic, or luxury décors while providing reference-grade performance that rivals the finest traditional designs. Elevate your listening experience with speakers that are as visually stunning as they are sonically exceptional—pure French luxury meets uncompromising audio excellence.

Architettura Sonora

Architettura Sonora speakers embody Italian artistry and acoustic innovation, transforming sound into sculptural elegance for both indoor and outdoor environments. Handcrafted from luxurious natural materials—such as marble, concrete, terracotta, and stone—these speakers double as exquisite design objects, seamlessly integrating into architecture, gardens, terraces, or luxury interiors while delivering immersive, natural, and truthful sound. Powered by premium B&C Speakers drivers, they feature omnidirectional or point-source configurations that produce warm, detailed, full-bodied audio with exceptional clarity, uniform coverage, and captivating presence—ideal for music, home cinema, or ambient soundscapes. Iconic models like the spherical Spherina (with options for integrated lighting), robust Cube, cylindrical Cylinder series, and striking floorstanders such as Icarus offer a perfect fusion of high-end performance and visual poetry. Architettura Sonora elevates audio to an art form: where breathtaking aesthetics meet uncompromising sonic purity, creating spaces that resonate with beauty and emotion.

Unveiling a new dimension of Bespoke Finish Solutions

Bowers & Wilkins

Bowers & Wilkins speakers represent the pinnacle of British audio craftsmanship, renowned for delivering True Sound with exceptional clarity, detail, and musicality. From the flagship 800 Series Diamond—featuring groundbreaking diamond tweeters and innovative Continuum cones—to the versatile 700 and 600 Series, every model is meticulously engineered with cutting-edge technology to set new standards in performance. At the absolute apex stands the iconic Nautilus, a legendary, hand-built masterpiece that has defined high-end audio for nearly 30 years with its revolutionary tapered tube loading, stunning spiral design, and unparalleled transparency—offering extraordinary sonic purity, vast three-dimensional soundstages, and breathtaking realism that captivates audio enthusiasts worldwide. Whether for hi-fi listening, home theater immersion, or wireless convenience, B&W speakers provide pristine, balanced sound, stunning imaging, and dynamic presence that bring music and movies vividly to life, all wrapped in elegant, timeless design.

PMC

PMC Speakers (Professional Monitor Company) is a British manufacturer renowned for its high-performance loudspeakers, handcrafted in the UK. They are known for delivering reference-level accuracy, exceptional clarity, and natural dynamics through their signature Advanced Transmission Line (ATL™) bass-loading technology. This design enables deep, controlled bass extension from relatively compact enclosures, with ultra-low distortion, rapid transient response, and lifelike sound reproduction—qualities valued in both professional and residential settings. PMC speakers maintain consistency across applications: the same core engineering ensures mixes created in studios translate accurately to home listening or cinema environments.

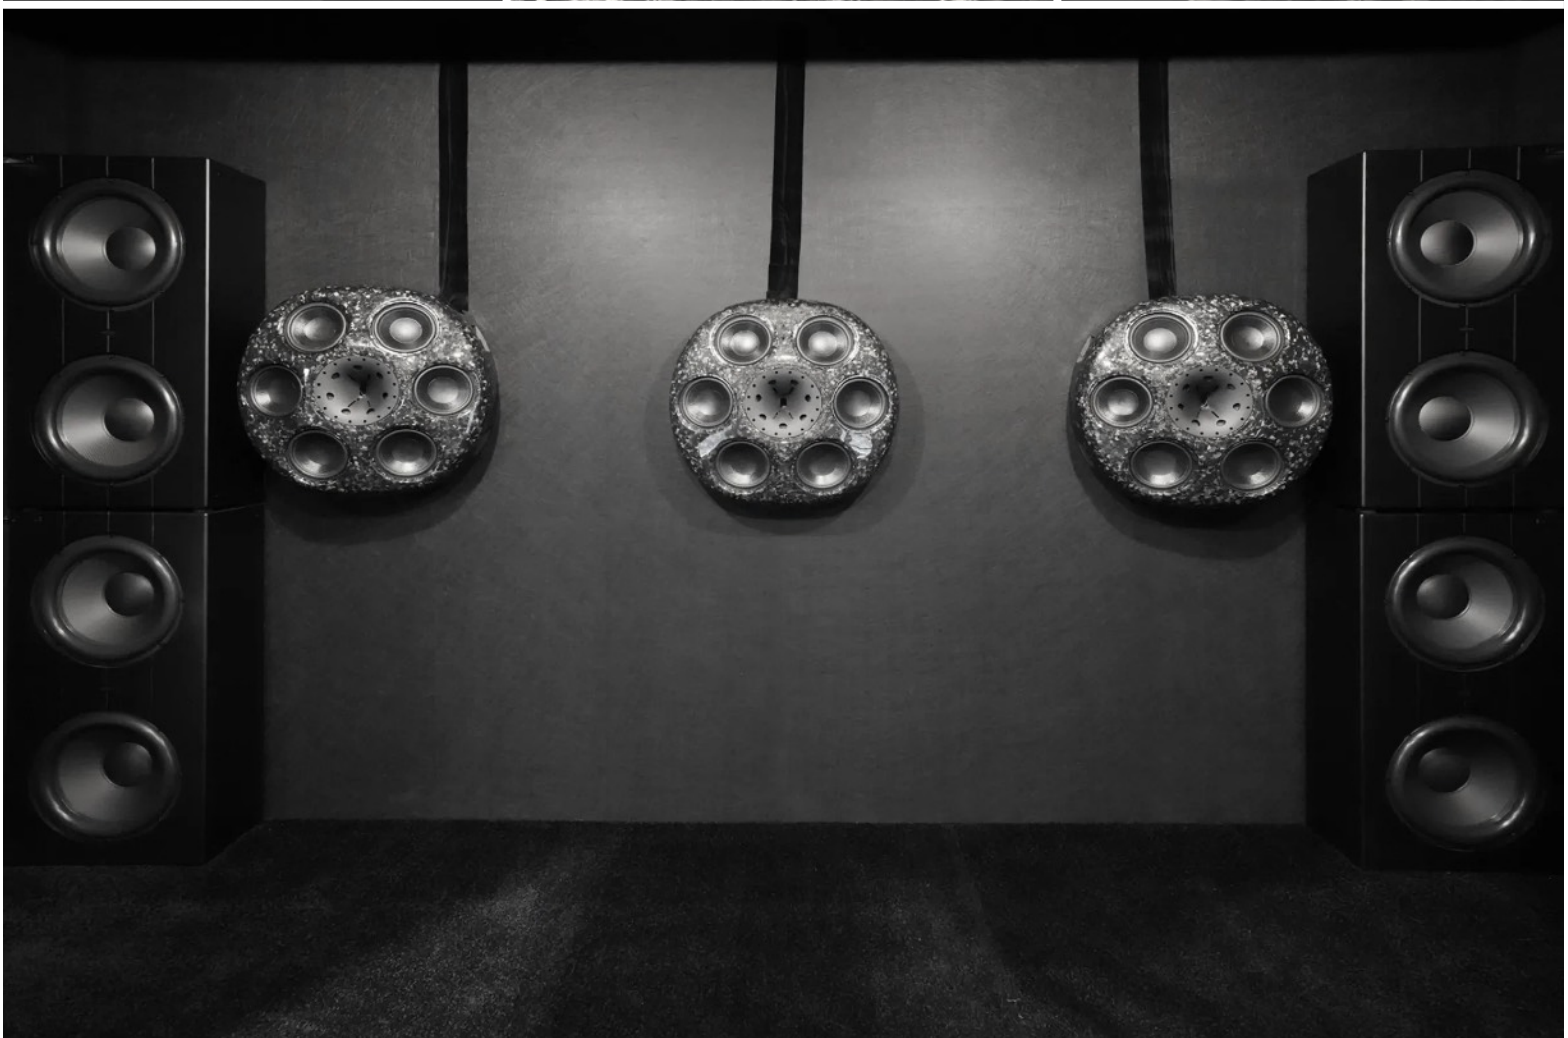

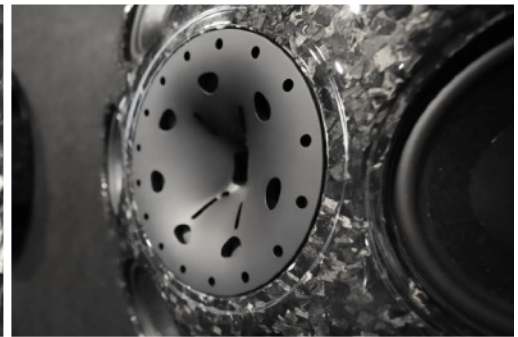

Laminair X

ASCENDO

ASCENDO Immersive Audio (AIA) is a German manufacturer specializing in high-performance speakers and subwoofers purpose-built for state-of-the-art residential home theater and private cinema installations. The brand emphasizes precision engineering, coaxial point-source designs for perfect time alignment and uniform coverage, infrasonic bass extension (down to single-digit Hz), and visceral, emotionally impactful sound with minimal distortion. ASCENDO systems are designed specifically for home cinema challenges—handling reflections, standing waves, and dynamics—delivering reference-level immersion where technology fades into the background. They excel in custom, high-output setups supporting Dolby Atmos and multi-channel formats.

Procella

Procella Audio is a Stockholm-based manufacturer (founded in 2005) specializing in high-performance surround sound loudspeaker systems and subwoofers, originally developed for professional cinema reference theaters (starting with DTS Europe). They focus on delivering cinema-grade dynamics, clarity, and power in residential high-end home theaters, screening rooms, and some professional setups. Procella emphasizes precise sound reproduction, high output with low distortion, and full dynamic range—from subtle details to explosive peaks—using pro-audio compression drivers, constant directivity waveguides, and high-efficiency designs for reference-level performance at home. Their speakers excel in immersive formats like Dolby Atmos, with versatile mounting options (on-wall, in-wall, on-ceiling, free-standing) and seamless timbre-matching across the lineup for consistent multi-channel soundstages.

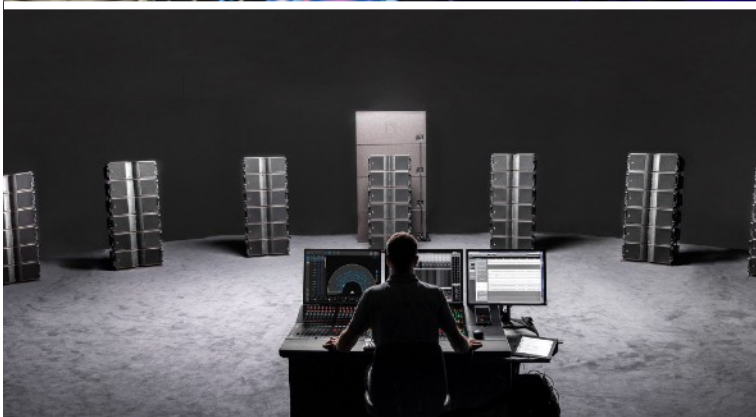

Alcons Audio

Alcons Audio is a Dutch manufacturer renowned for its patented pro-ribbon driver technology, delivering exceptional clarity, ultra-low distortion, high dynamics, and 1:1 accurate sound reproduction. Founded with a focus on professional audio, Alcons combines hi-fi-like precision with live-sound power, making it ideal for critical listening and high-impact applications. Their systems feature pro-ribbon drivers for superior transient response, wide dispersion, and consistent tonal balance across SPL levels, often paired with dedicated amplification and processing for optimal performance. Alcons serves professional touring/installation, cinema, studio reference, and increasingly high-end residential cinema markets, with seamless translation from pro to private setups.

L-Acoustics - DJ

L-Acoustics DJ is a 2025-launched spatial audio system (shipping 2026) that turns standard stereo DJ mixes into live, immersive 3D soundscapes without changing the DJ's workflow or gear. Using low-latency machine-learning (Source Separate), it splits stereo tracks into stems (drums, bass, vocals, etc.) in real time, then applies L-ISA processing to position and move elements dynamically in 3D space—creating orbiting effects, depth, and venue-filling immersion. Core components: DJ control app (touch-based, with Moods presets: Stereo, Wave, Vocal Focus, Immersive) L-ISA Processor II, P1 processor, LA Network Manager. Fully compatible with any L-Acoustics speakers and amps (scalable 2D to full 3D arrays) Who benefits: Professional DJs – for creative spatial mixing and unique live performances. Nightclub/venue owners – to attract talent, boost engagement, and stand out with next-level sound. Festival and event producers – for immersive electronic music stages. High-end AV integrators – offering cutting-edge nightlife systems. It delivers unmatched crowd immersion and emotional impact in clubs, festivals, or events.

L-ACOUSTICS

L-Acoustics - Home Theater

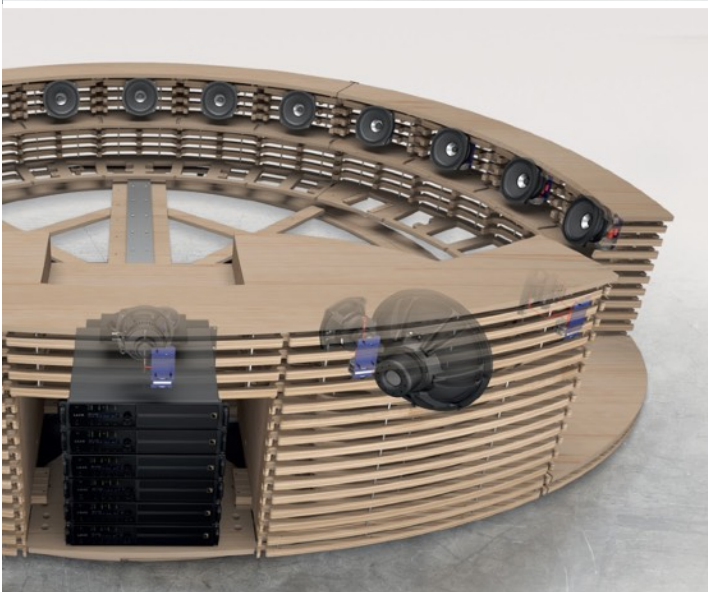

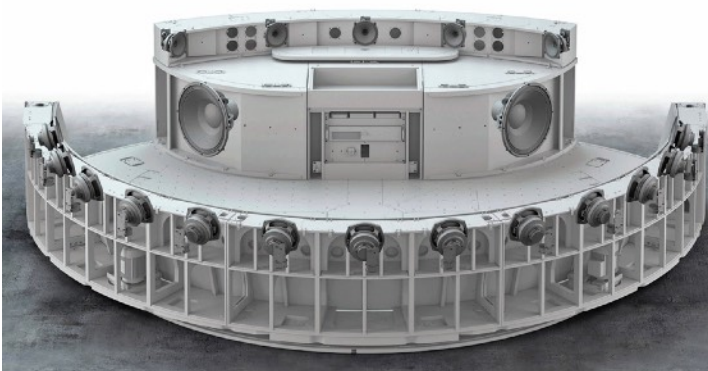

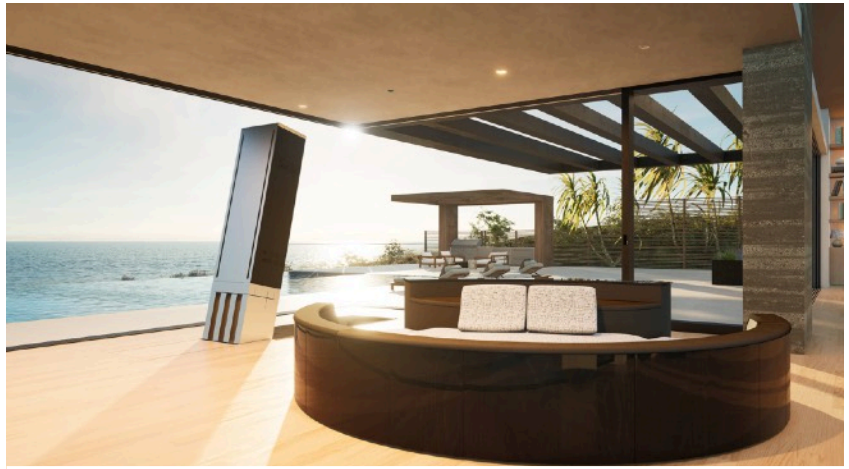

L-Acoustics Home Theater brings the same powerful, concert-grade sound that powers the world's biggest tours, festivals, and venues straight into your home. Designed for luxury media rooms, dedicated screening spaces, or multi-purpose entertainment areas, L-Acoustics delivers unmatched dynamics, crystal-clear clarity, and explosive impact with ultra-low distortion—making every movie feel like a theatrical event and every music track come alive with live-performance realism. Their systems support immersive formats like Dolby Atmos, using discreet, high-performance speakers such as the ultra-shallow X4i, versatile Soka, or slim Syva series for seamless architectural integration, paired with advanced amplification and DSP for precise, room-filling coverage and wide sweet spots. Ideal for discerning homeowners, film enthusiasts, and sound connoisseurs who want reference-level cinematic and musical experiences without compromise, L-Acoustics transforms ordinary home entertainment into an extraordinary, emotion-driven journey.

L-ACOUSTICS

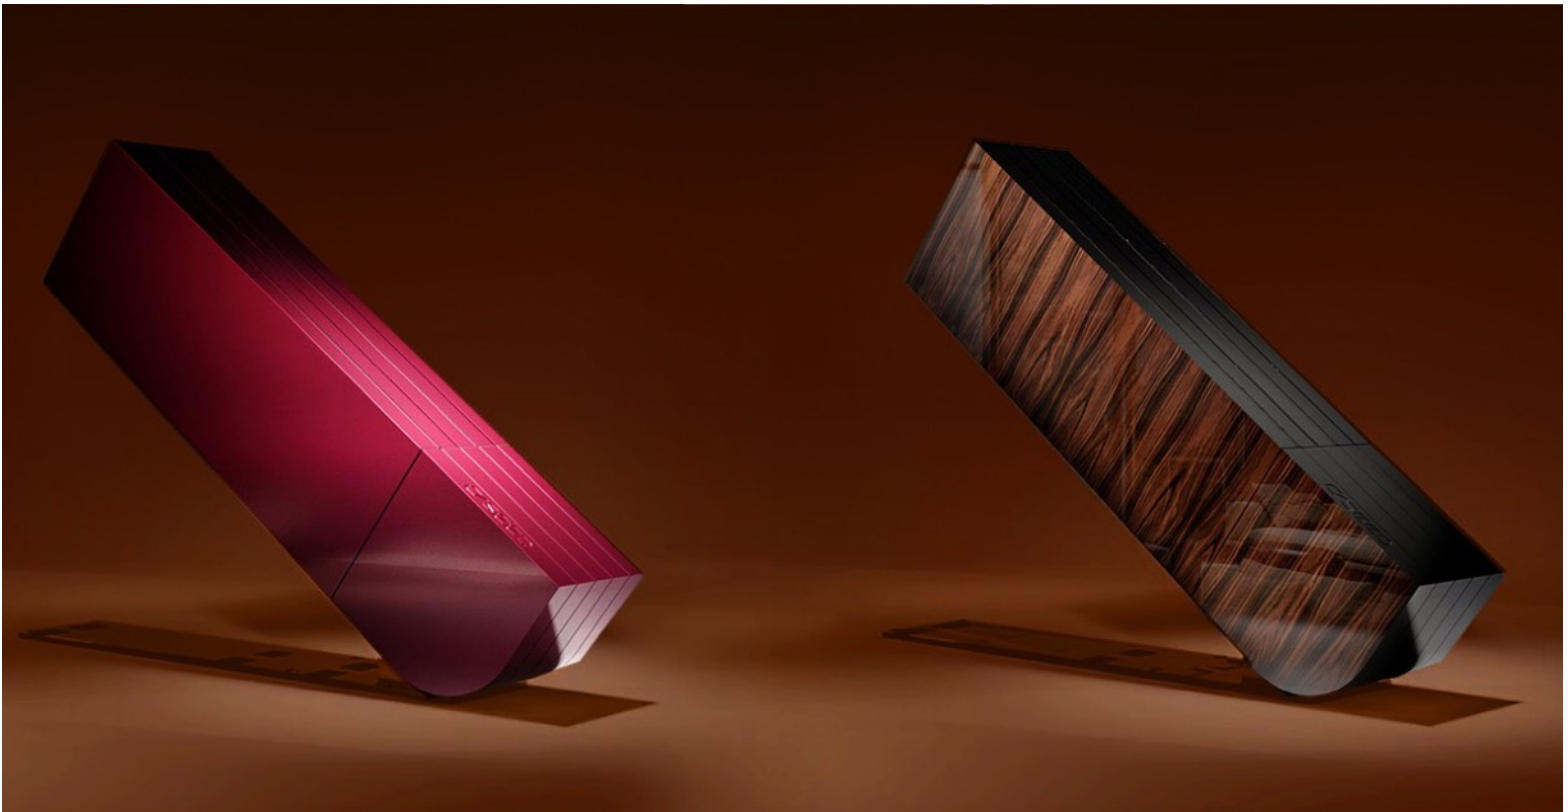

L-Acoustics - Island

L-Acoustics Island is the ultimate ultra-premium immersive audio lounge from L-Acoustics Creations, placing you inside a concert-grade 3D soundstage for the most extraordinary private listening and entertainment experience. This luxurious, elliptical seating platform hides a precision-aligned array of up to 18+ professional speakers plus powerful subwoofers, powered by L-ISA Immersive Hyperreal Sound to deliver reference-level clarity, explosive dynamics, ultra-low distortion, and true spatial immersion far beyond conventional systems. It supports Dolby Atmos, DTS:X, and high-res formats with object-based audio that lets sounds move dynamically around you, all while offering supreme comfort in a plush, customizable design (with options like 360° rotation in Prestige models) that blends discreetly into luxury media rooms or private cinemas. Perfect for discerning audio enthusiasts, film lovers, and high-end collectors who want an emotionally immersive, concert-hall-like journey at home—where the line between listener and sound vanishes. Private demos are available in Los Angeles—schedule yours today!

C SEED

C SEED foldable TVs are ultra-luxury, large-format MicroLED televisions from the Austrian brand C SEED, engineered to vanish when not in use and dramatically unfold into massive cinematic displays. These innovative TVs feature seamless, high-brightness MicroLED panels that either rise gracefully from the floor (M1 series) or emerge from a sleek sideboard-style base (N1 series), transforming from compact, sculptural furniture into screens up to 165" or even larger in specialized outdoor models. Designed for both indoor luxury environments and outdoor terraces, poolsides, or superyachts, they deliver true MicroLED performance with perfect blacks, vibrant colors, exceptional contrast, HDR10+ support, and brightness high enough for clear visibility in direct sunlight. The silent, precision-engineered folding mechanisms unfold in seconds to minutes, while features such as 180° rotation, weatherproof construction, customizable finishes, and integrated high-end audio make them striking architectural statement pieces. C SEED foldable TVs are ideal for ultra-high-net-worth individuals, luxury homeowners, and superyacht owners who want a breathtaking home cinema experience that combines cutting-edge technology with avant-garde design, providing unparalleled immersion for movies, sports, and events without permanently dominating the space.

Deus Audio – INVICTA 60

The INVICTA 60 from Deus Audio represents a complete rethinking of infrasonic reproduction rather than a mere evolution of subwoofer design. At its heart is a massive 60-inch custom driver powered by the proprietary MASS Drive™ motor system, which delivers unprecedented infrasonic power with surgical accuracy—creating bass that is not just heard but physically felt throughout the body. Developed through years of intensive, focused R&D, the Invicta 60 integrates the advanced MASS Drive™ motor, cutting-edge suspension technologies, real-time thermal monitoring, and a fully modular architecture, with every component meticulously designed, machined, and assembled in-house to guarantee total control over performance and uncompromising quality. The result is the largest, cleanest, and most precise infrasonic subwoofer ever created, serving as the ultimate reference for ultra-high-end cinemas, production studios, premier dance clubs, dedicated screening rooms, ride and attraction special effects, and high-accuracy live sound applications where only the impossible will do.

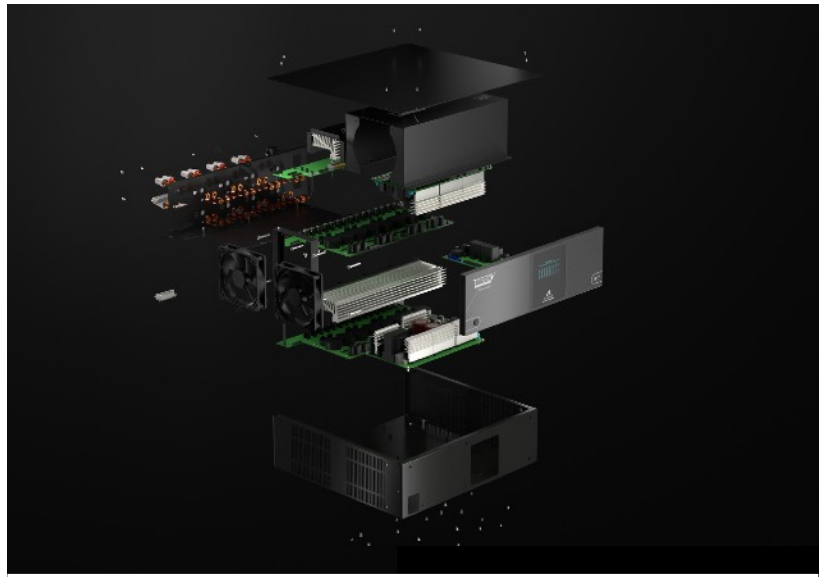

Ascendo – THE64 SUB PRO PASSIVE SEALED

The 64 SUB PRO PASSIVE SEALED Infrasonic Subwoofer does not just play bass – it opens a portal to the unknown. Designed to go far beyond the boundaries of what was thought physically possible, this monumental subwoofer reaches depths few have ever felt, let alone heard. It is the definitive proof that infrasonic reproduction is not a luxury in high-end cinema – it is a necessity. This is no ordinary subwoofer. It is a revelation. At its heart beats a custom-engineered 64" driver, the second-largest cinema subwoofer driver ever built – dwarfed only by its sibling, THE100 SUB PRO PASSIVE. Fueled by 10-22 kW of DSP-controlled power through ASCENDO's cutting-edge Speaker Management Technology, it commands the air with absolute authority. Unmatched Performance. Unrivalled Impact With each full excursion, THE64 displaces as much air as 40 18" subwoofers – a figure that is almost inconceivable until experienced. Its output is monumental: Up to 148 dB peak SPL 113 dB LFE reference level at 5 Hz – in large rooms. Effortless frequency response down to 1 Hz, yet with all that force, it remains incredibly fast and surgically precise. Thanks to its sealed, ultra-rigid braced enclosure and exceptionally low resonance frequency, THE64 SUB delivers a lightning-fast impulse response and class-leading low group delay below 20 Hz – outperforming every other subwoofer on the market in its class.

Trinnov Audio

Trinnov Audio processors deliver the ultimate in high-end audio performance with patented technologies like the Optimizer™ for precise digital room correction, 3D remapping, advanced bass management, and immersive decoding. Handcrafted in France, they transform any space into a reference listening environment by correcting acoustics, optimizing speaker placement, and ensuring flawless sound reproduction for music, movies, and professional use. The flagship Altitude series (Altitude 16, 32, 48ext, and the new Altitude CI) sets the standard for immersive home theater, supporting up to 32+ channels with native Dolby Atmos, Auro-3D, DTS:X, object-based audio, WaveForming™ multi-sub control, extensive routing (including Dante AoIP), and an intuitive modern interface. Additional products include the Amethyst and NOVA for Hi-Fi/stereo optimization, Amplitude amplifiers, and Ovation2 for commercial cinema. Perfect for luxury home theaters, screening rooms, high-end Hi-Fi setups, professional studios (broadcast, post-production, music), and commercial cinemas where absolute accuracy, immersive depth, and reliable translation of the original mix are non-negotiable. Trinnov turns difficult rooms into world-class listening experiences.

TRINNOV
AUDIO

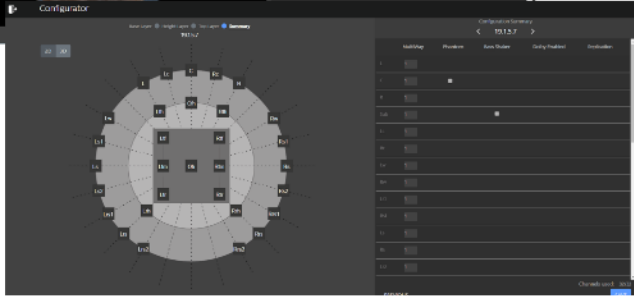

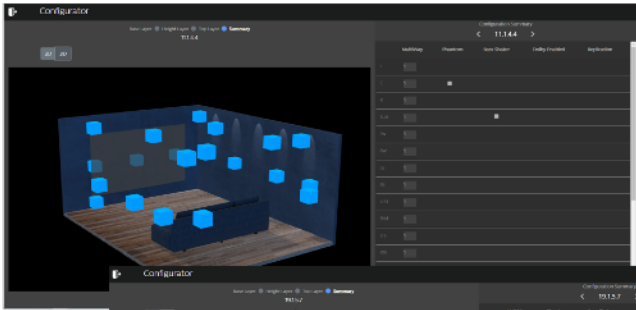

Introducing **ALTITUDE** CI

One Platform. Every Project.

StormAudio

StormAudio processors and amplifiers deliver the ultimate in luxury home theater sound, with reference-level clarity, explosive dynamics, and precise 3D immersion that makes every movie and track feel breathtakingly real. French-engineered and fully modular, they feature advanced Dirac Live Active Room Treatment for exceptional bass precision and room correction, support for Dolby Atmos, DTS:X, Auro-3D, and high channel counts (up to 32+), plus flexible Dante/AoIP integration and intuitive control. From the flagship ISP Elite MK3 series to the compact Core 16+ and powerful Impulsion 8 amps, StormAudio offers scalable, future-proof performance backed by a 5-year warranty. Perfect for discerning homeowners and custom integrators who demand uncompromising audio quality and emotional impact in their private cinema.

AudioControl

AudioControl offers high-performance home theater receivers, processors, and amplifiers tailored for custom installs, luxury cinemas, and immersive audio setups. Known for clean power, advanced room correction (including Dirac Live® and Dirac Live Bass Control), and support for modern formats, their products deliver precise, dynamic sound with excellent integration into smart home systems (Crestron, Control4, etc.).

Marantz

Marantz home theater receivers and amplifiers combine legendary musical warmth with powerful, immersive cinema performance, making them a favorite for custom installs, luxury media rooms, and high-end home theaters. Renowned for their refined sound signature—rich mids, smooth highs, and controlled bass—Marantz products deliver emotional, fatigue-free listening for movies, music, and gaming, with advanced HDMI 2.1 (8K/4K120 support) and support for the latest immersive formats.

Sony

Sony home theater receivers deliver dynamic, detailed sound with a focus on cinematic immersion, gaming performance, and reliable connectivity, blending Japanese engineering precision with support for the latest formats and video standards. Known for clean amplification, excellent upscaling, and features like 360 Spatial Sound Mapping and Digital Cinema Auto Calibration IX, Sony AVRs excel in creating wide, engaging soundstages for movies, music, and high-frame-rate gaming.

LEA

LEA Professional is an American audio brand specializing in smart, high-performance amplifiers for professional AV installations, luxury home theaters, and custom residential systems. Designed in South Bend, Indiana—a historic hub for amplifiers—the products are developed in the USA with some manufacturing overseas. Their IoT-enabled "smart amps" offer cloud connectivity for remote monitoring and control, flexible LoZ/HiZ power distribution (including 70V/100V), built-in DSP, free speaker tunings from brands like Triad and Stealth Acoustics, and Dante/AES67 networking. This provides clean, powerful sound, precise control, easy integration, and future-proof scalability—ideal for immersive and multi-zone audio setups.

MC2 Audio

MC2 Audio amplifiers are British-engineered, ultra-high-quality professional power amplifiers renowned for exceptional fidelity, reliability, and sonic transparency, making them a strong choice for high-end home theater, studio monitoring, and custom installation applications. Founded in 1993, MC2 Audio focuses on innovative designs with low distortion, high current delivery, and robust build quality—often praised in pro-audio and audiophile circles for delivering clean, detailed, and powerful performance that rivals or exceeds many dedicated hi-fi amps.

Torus Power

Torus Power is a Canadian manufacturer (based in Toronto) specializing in premium toroidal isolation power transformers and conditioners, engineered to dramatically enhance audio, video, and control systems by providing clean, stable, noise-free power. With over 40 years of toroidal innovation, Torus Power focuses on no-compromise quality, silent operation, high instantaneous current delivery, and advanced protection—eliminating power line noise, harmonics, and surges to unlock greater dynamics, improved imaging, cleaner bass, crisper video, darker blacks, and brighter colors in connected equipment. Their products use proprietary technologies like Narrow Bandwidth Technology (NBT) for superior noise rejection, Automatic Voltage Regulation (AVR) for stable output, and high-current toroidal designs for effortless performance under load.

Christie Digital

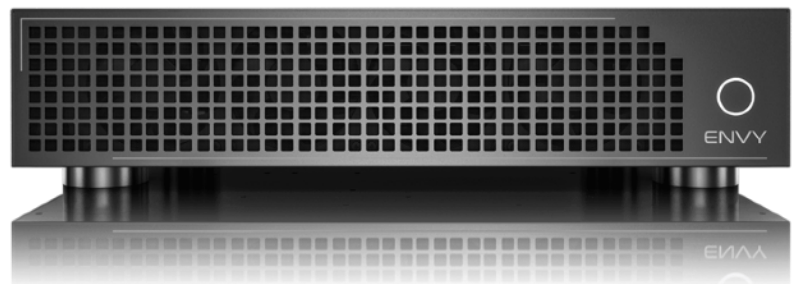

Christie Digital projectors turn your home theater into a true cinematic experience, delivering the same stunning picture quality found in the world's top commercial theaters—right in your living room or dedicated screening space. Engineered in Kitchener, Ontario, Canada, and manufactured in their state-of-the-art facility in Shenzhen, China, these projectors are widely regarded as among the best available for premium home use, offering brilliant brightness, rich and lifelike colors, deep blacks, and razor-sharp detail that make movies, sports, and special events feel larger-than-life on massive screens—even with some ambient light. Their advanced laser technology ensures vibrant, consistent images year after year with minimal maintenance, while the sleek, professional design blends beautifully into luxury spaces. Perfect for discerning homeowners who want jaw-dropping immersion and the wow factor of a real cinema at home—without compromise on quality or excitement.

CHRISTIE
DIGITAL SYSTEMS

madVR

madVR Envy video processors are the gold standard for premium home theater picture quality, turning any projector or large-screen TV into a reference-level cinematic experience with unmatched HDR tone mapping, upscaling, and aspect ratio control. These dedicated processors optimize every frame in real time for brilliant highlights, deep shadows, vibrant colors, razor-sharp detail, seamless black bar removal, and effortless calibration—making movies look exactly as the director intended. Available in the versatile Envy Core (great for media rooms or more accessible setups) and the flagship Envy Extreme MK3 (for the most demanding dedicated theaters), they integrate simply via HDMI and pair perfectly with top systems from Sony, JVC, Trinnov, and more. Ideal for discerning homeowners and luxury cinema lovers who want jaw-dropping immersion and natural, fatigue-free visuals that elevate every viewing session to blockbuster level.

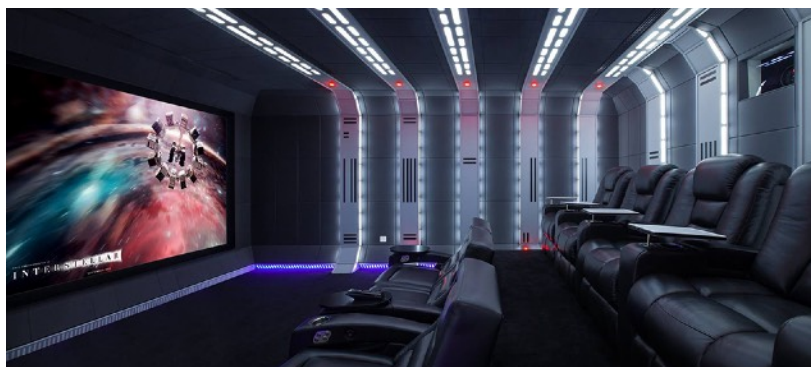

Kaleidescape

Kaleidescape is the ultimate premium movie platform for your home theater, delivering reference-quality 4K HDR movies with lossless audio that far surpasses streaming—making every film feel like a theatrical premiere in your own space. Own and instantly access a vast library of blockbuster titles (including Dolby Vision and Atmos) through beautiful, intuitive apps and dedicated players like the Strato E (entry-level 4K), Strato C (immersive cinema-grade), or the compact Mini Terra Prime server (fanless, solid-state storage). No discs, no buffering, no ads—just pure, director-intended picture and sound with effortless browsing and seamless integration into luxury systems. Crafted for those with impeccable standards who want the absolute best movie experience at home—crystal-clear details, vibrant colors, powerful dynamics, and the convenience of a personal collection.

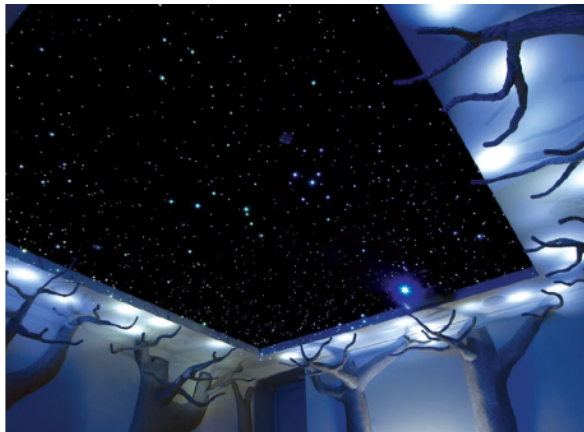

Seymour Screen Excellence

Seymour Screen Excellence projection screens bring your home theater to cinematic perfection with the world's best acoustically transparent fabrics, letting you hide speakers behind the screen for flawless sound and picture integration. Their advanced woven materials—like Enlightor™ for crystal-clear 4K+ resolution and Ambient-Visionaire™ for superior ambient light rejection—deliver sharp detail, vibrant colors, deep contrast, and natural audio without visible perforations or sound loss. With options for fixed-frame, motorized masking, velvet borders, and custom giant sizes, these screens create a seamless, immersive experience that blends beautifully into luxury spaces. Ideal for discerning homeowners who want reference-level visuals and audio in dedicated screening rooms—true suspension of disbelief for movies and events.

Simplified Acoustics

Simplified Acoustics specializes in high-performance acoustic treatments that make your home theater, media room, or multipurpose space look stunning while sounding exceptional. They offer custom SiM-Panels™ acoustic absorption panels (fiberglass with resin-hardened edges or rigid frames for durability and stretch fabric support), diffusion panels, bass traps, and isolation materials, all designed to control reflections, reduce echo, tame bass issues, and optimize clarity and imaging. With a strong emphasis on aesthetics, they provide beautiful fabric choices, 3D room design/rendering services, and full installation—plus creative add-ons like fiber optic starfields and Nebula lighting for immersive ambiance. Perfect for homeowners building dedicated home theaters or media rooms who want professional-grade sound control without sacrificing style or visual appeal.

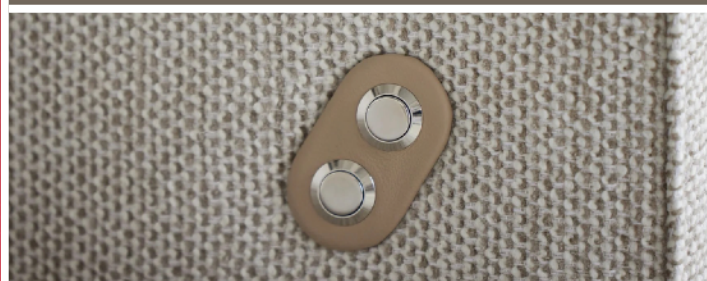

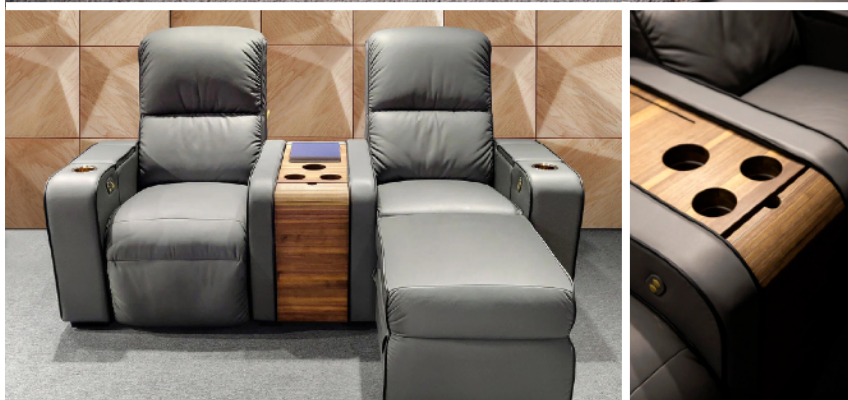

Acoustic Innovations

Acoustic Innovations transforms your home into a world-class private cinema with custom-designed, high-performance media environments that blend cutting-edge acoustics with stunning aesthetics. As the industry's premier designer, manufacturer, and installer for over 25 years—with more than 4,000 theaters created worldwide—they serve as a true one-stop shop for design professionals and discerning homeowners. Their offerings include fully custom theater styles (from modern and architectural to themed, futuristic, or rustic), pioneering modular reclining theater seating (handmade in High Point, North Carolina, with 12 comfortable models built from premium materials), immersive fiber optic starry ceilings to eliminate reflections and enhance the viewing magic, acoustic panels, Concerto Stretch Wall systems, Wallscapes, and specialty elements like tufted doors and acoustical fabrics for optimal sound control and visual appeal. Ideal for luxury homeowners seeking an immersive, comfortable, and acoustically perfect screening room that feels like a personal movie palace—delivering exceptional sound clarity, breathtaking visuals, and elegant design tailored to any budget or space.

Moovia

Moovia brings premium, handcrafted luxury seating to your home theater and media room, transforming ordinary viewing into an elegant, immersive cinematic escape. Rooted in German heritage and meticulously crafted in Germany, these bespoke chairs and sofas feature adjustable head, back, and footrests, trizone lumbar support, integrated cupholders, storage compartments, and luxurious extras like temperature control, ambient lighting, and massage functions for ultimate comfort during long movie sessions. With stylish models like MARBELLA, ROME, VENICE, MILANO, ALPHA, and OSLO—offering extensive customization in fabrics, leathers, woods, and smart integration options—Moovia blends modern design, timeless elegance, and seamless functionality to create communal, film-worthy spaces that look as stunning as they feel. Ideal for discerning homeowners, interior designers, architects, and custom integrators who want sophisticated, high-end seating that elevates dedicated screening rooms, media lounges, or living room cinemas without sacrificing style or comfort.

Lunar Walls

Lunar Walls brings cutting-edge MicroLED video walls to luxury home theaters, offering massive, seamless displays that deliver breathtaking large-format visuals far surpassing what traditional projectors or even the largest TVs can achieve. These advanced LED solutions provide true-to-life colors, exceptional sharpness and clarity, energy-efficient operation, and an impressive 100,000-hour lifespan for years of stunning, virtually maintenance-free enjoyment. The result is a captivating "lunar oasis" experience—jaw-dropping scale, lifelike depth, and razor-sharp detail that elevates movies, live sports, gaming sessions, and special events to an extraordinary cinematic level right in your home. The flagship Expanse line features pre-engineered yet fully customizable video walls, perfectly tailored to your room's dimensions, layout, and personal style—whether you're designing a cozy dedicated theater or an expansive, statement-making media lounge—while the upcoming Ledge series introduces convenient pre-packaged options for simpler and faster integration. With a strong emphasis on reliability, professional installation through authorized dealers, and eco-conscious engineering, Lunar Walls is the ideal choice for discerning homeowners seeking the ultimate wow-factor cinema setup: brilliant, consistent, high-impact imagery on giant screens that completely transforms your space into a world-class entertainment destination.

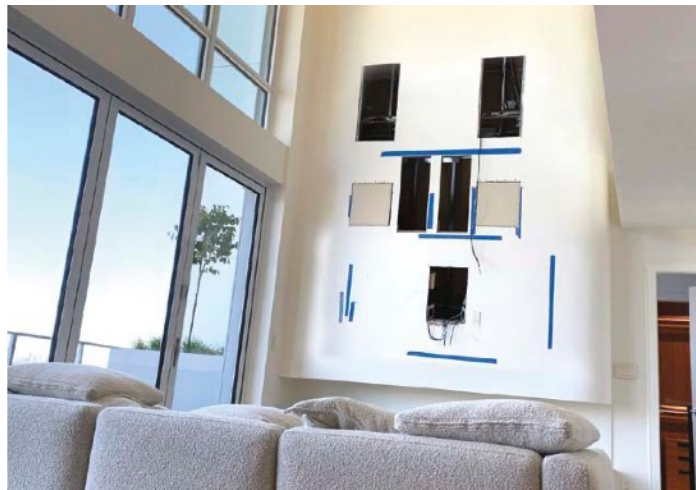

Stealth Acoustics – SPTV1 Extreme

Stealth Acoustics SPTV1 Extreme is the ultimate retractable outdoor LED TV system for luxury patio and backyard theaters, creating a jaw-dropping cinematic experience that disappears when not in use. This pop-up marvel features massive 16:9 LED screens in sizes from 105" to 190", rising vertically from a sleek, weatherproof aluminum and stainless steel cabinet (with options for above-ground, partial, or full recess installation). Engineered for direct sunlight viewing with ultra-high 4,000 nits brightness, it includes smart sensors for ambient light, rain, and optional wind protection, ensuring crystal-clear visuals day or night. Audio options deliver powerful, rust-free sound—choose integrated 3.1 cabinet-mounted speakers (operable even with the screen closed), a rising 3.0/3.1 soundbar that ascends with the display, or no built-in audio for custom setups—all seamlessly integrating with outboard AV racks and major home automation systems. Perfect for discerning homeowners, luxury residences, pool decks, hotels, sports venues, or event spaces who want an immersive "wow" factor for outdoor movie nights, game days, or gatherings—without permanently cluttering the landscape.

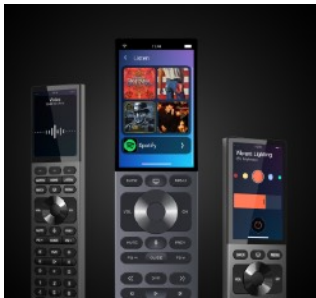

Stealth Acoustics – Invisible Speakers

Stealth Acoustics invisible speakers deliver exceptional high-performance audio that completely disappears into your walls or ceilings, preserving the pristine look of luxury home theaters, media rooms, and living spaces while providing powerful, detailed, and natural sound without any visible grilles, frames, or boxes. Their patented flat-panel technology uses advanced radiating diaphragms and precision drivers to create room-filling audio with excellent clarity, precise imaging, wide dispersion, and impressive bass extension—perfect for immersive setups where architectural beauty and sonic quality must go hand in hand. The latest generation brings significant improvements in efficiency, transducer design, crossover engineering, and installation simplicity, resulting in even cleaner, more dynamic sound across music, movies, and multi-channel cinema systems. For outdoor or demanding environments, their high-performance full-range 3-way models offer robust power handling, wide coverage, sparkling highs, smooth mids, and deep bass in weatherproof, discreet packages that blend seamlessly into patios, pool areas, or marine settings. Ideal for sophisticated homeowners and custom integrators who want invisible, reference-grade audio that integrates effortlessly into any design while delivering professional-level performance and emotional impact for movies, music, and immersive experiences.

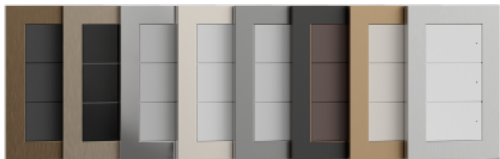

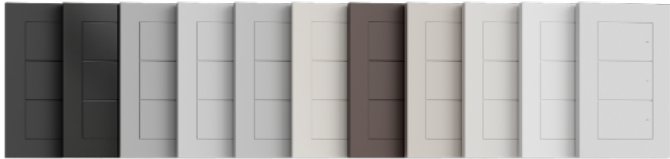

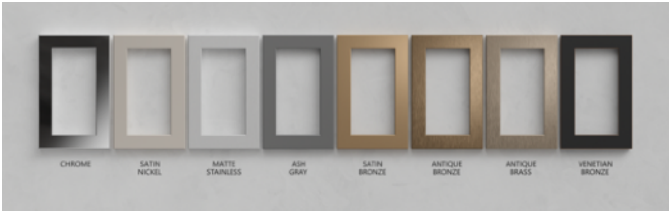

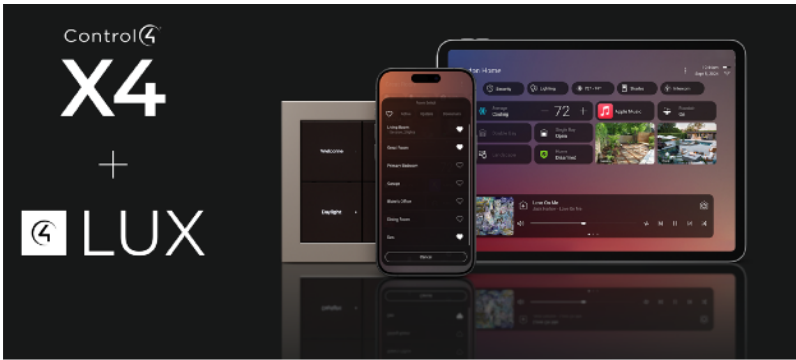

Control4

Control4 is a premium smart home automation system that seamlessly integrates and controls lighting, entertainment, security, climate, shades, and more into one intuitive platform. Designed for personalized living, it connects a vast array of devices—both native and third-party—through a powerful operating system, enabling effortless automations, custom scenes, and total home management from touchscreens, apps, voice commands, or remotes. Professionally installed and endlessly customizable, Control4 transforms everyday spaces into responsive, luxurious environments that enhance convenience, comfort, security, and entertainment.

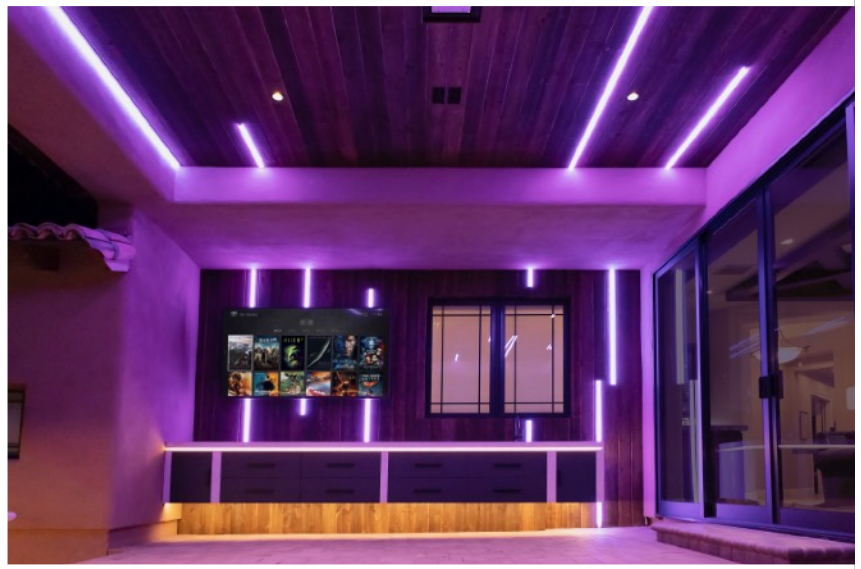

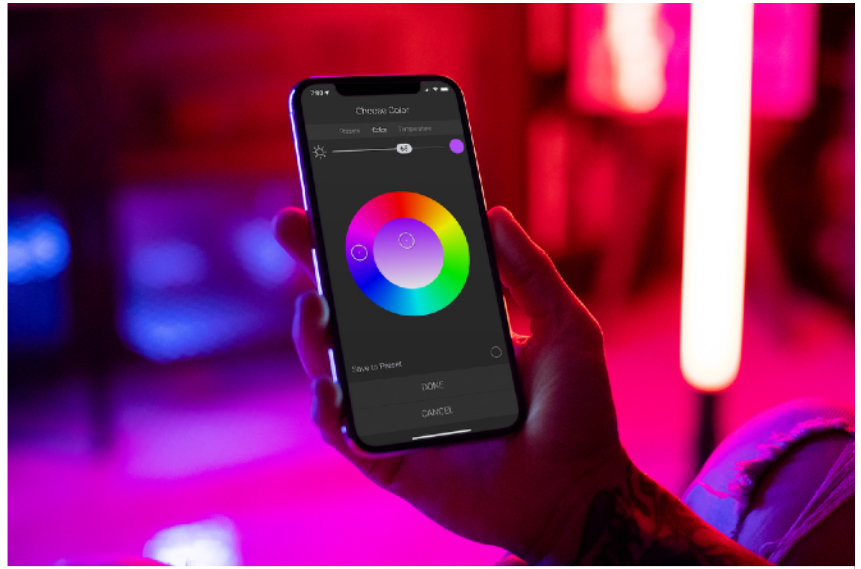

Control4 - LUX

Lux by Control4 is a premium collection of elegant keypads, dimmers, switches, and outlets meticulously crafted for luxury spaces. Elevating smart lighting control, it combines refined aesthetics with advanced functionality, featuring premium metal faceplates in designer finishes like Antique Bronze, Chrome, Satin Nickel, and Venetian Bronze, along with customizable, backlit, engravable buttons for personalized style. Seamlessly integrated into the Control4 ecosystem, Lux offers superior dimming performance across diverse loads—including LEDs—via patent-pending technology, available in both wireless (Zigbee) and wired options. Professionally installed, it transforms walls into sophisticated control points that enhance ambiance, convenience, and timeless elegance in high-end homes.

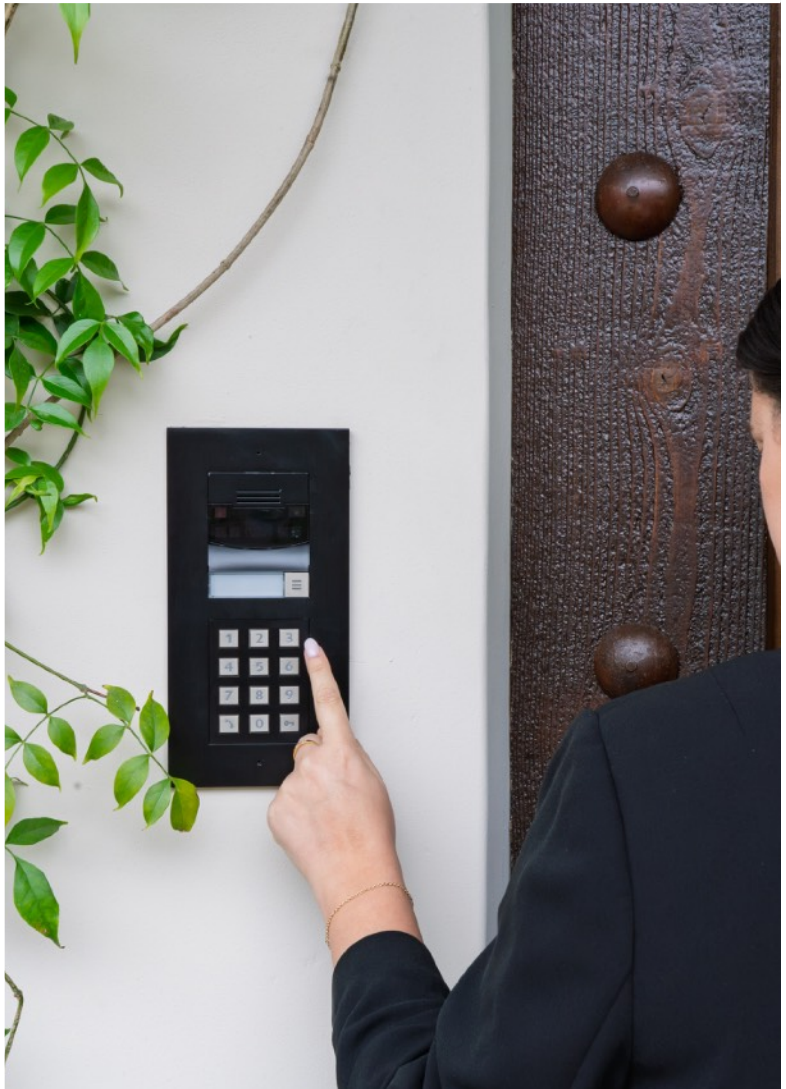

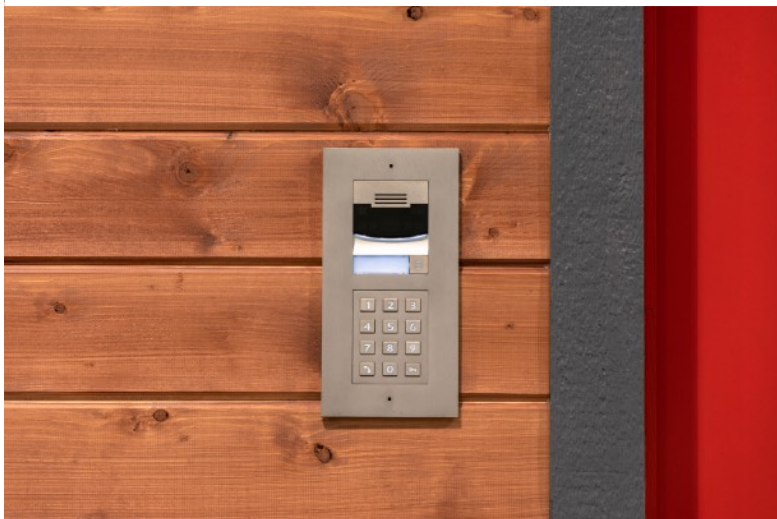

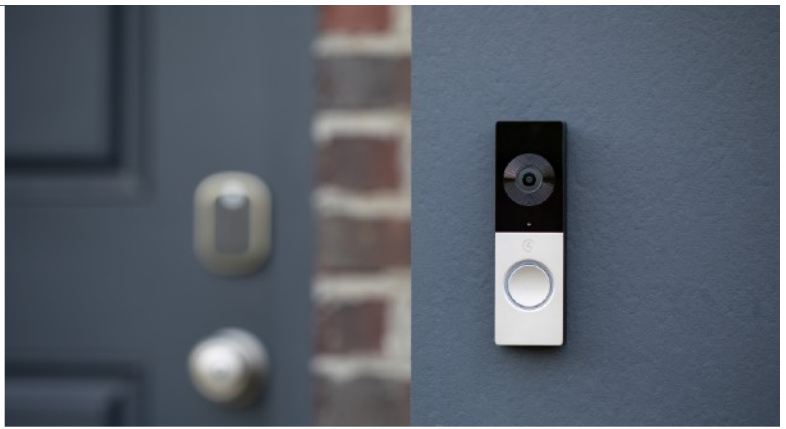

Control4 - Vibrant

Vibrant by Control4 is an advanced dynamic LED lighting solution that delivers customizable illumination for any space. Featuring high-performance linear options like tunable white, RGBW, RGBTW, fixed color, and circadian rhythm capabilities, it uses premium LED strips with aluminum extrusions for superior diffusion and shadow-free accents that highlight architecture. Seamlessly integrated into the Control4 ecosystem via Zigbee, DMX, or DALI, it allows effortless control of color, temperature, brightness, and effects for immersive, personalized scenes. New Vibrant Smart Bulbs and Recessed Trim Lights extend the portfolio, bringing high-quality, dynamic lighting in a wireless, accessible format. With outstanding color accuracy (CRI 92+), smooth dimming to 1%, and native Zigbee 3.0 integration, they enable simpler installations without complex infrastructure—ideal for scalable, whole-project lighting experiences.

Control4 – Door Station/Door Chime

Control4 Chime Video Doorbell and Door Stations deliver advanced front-entry security and communication for luxury smart homes. The Chime Video Doorbell, purpose-built for the Control4 ecosystem, provides crisp HD video, two-way audio, motion detection, and seamless integration to view visitors, speak with them, and control connected home features from touchscreens, the app, or voice—all with premium finishes in black or satin nickel for an elegant appearance. Complementing this, Control4 Video Door Stations (such as the DS3 series) offer robust IP-based intercom solutions for front doors, gates, or entryways, featuring full-motion HD video, high-quality audio, motion detection, and reliable monitoring. Available in sophisticated finishes like Elegant Black, Brushed Nickel, and Venetian Bronze, with flush or surface-mount options, they enable crystal-clear Intercom Anywhere to any Control4 touchscreen or mobile device. Professionally installed, these solutions enhance security, convenience, and sophistication, keeping you connected and in control at every entrance.

DoorBird

DoorBird IP Video Door Stations integrate seamlessly with the Control4 ecosystem, delivering premium front-door security and intercom functionality for luxury smart homes. These high-quality, German-engineered devices feature crisp HD video, two-way audio, motion detection, night vision, and customizable relays for controlling locks, gates, or strikes. Available in a wide range of sophisticated finishes, materials, and configurations—including surface or flush mount, single or multi-button options, and models with keypads—they blend timeless design with advanced IP technology. Through certified Control4 drivers and SIP integration, DoorBird enables effortless viewing of live video, answering calls with crystal-clear Intercom. Anywhere on touchscreens or the app, receiving real-time notifications for doorbell rings or motion, and triggering automations like unlocking doors—all from the unified Control4 interface. Professionally installed, DoorBird enhances entrance security, convenience, and elegance, providing reliable, feature-rich front-door communication that complements Control4's comprehensive home automation.

Access Networks

Access Networks delivers enterprise-grade networking solutions designed for high-performance, reliable connectivity in demanding environments. These solutions ensure reliable performance, enabling technology to function as intended—every single time. Featuring cutting-edge Wi-Fi access points—including the latest Wi-Fi 7 models with patented BeamFlex+ adaptive antenna technology—along with powerful switches, and cloud-based management tools, every access point is packed with patented technologies that deliver a connected experience unlike any other. This provides seamless coverage, multi-gigabit speeds, interference mitigation, and support for dense device ecosystems, offering rock-solid performance for streaming, surveillance, IoT, and bandwidth-intensive applications. Upgrade paths are available with the latest leading-edge solutions when a smart home network needs a refresh. Systems are supported by a team of top certified engineers dedicated to providing the best user experience possible. Professionally installed, Access Networks offers scalable, future-proof infrastructure that eliminates connectivity bottlenecks and supports sophisticated connected living—works great with Control4 for an enhanced smart home experience.

Sophos

Sophos Firewall/Routers provide enterprise-grade security and routing for high-performance smart homes and connected environments. Featuring the advanced XGS Series with Xstream architecture, these next-generation devices deliver powerful protection against malware, ransomware, viruses, and sophisticated cyber threats through deep packet inspection, TLS inspection, intrusion prevention (IPS), application control, web filtering, and synchronized security features. Optimized for demanding networks, they offer high throughput, multi-gigabit speeds, seamless traffic acceleration for trusted applications, and robust connectivity options—including 2.5 GE interfaces and optional expansions like 5G—ensuring reliable performance without bottlenecks for streaming, surveillance, IoT devices, and bandwidth-intensive applications. Professionally installed, Sophos Firewall/Routers form a secure, scalable foundation that safeguards the entire network while maintaining optimal speed and visibility—works great with Control4 for an enhanced, protected smart home experience.

Fortinet

Fortinet FortiGate Firewall/Routers deliver enterprise-grade security and high-performance routing for sophisticated smart homes and connected environments. As the world's most deployed next-generation firewalls (NGFWs), these devices provide comprehensive protection against malware, ransomware, advanced threats, and cyberattacks through features like deep packet inspection, intrusion prevention (IPS), application control, web filtering, SSL/TLS inspection, and AI-powered FortiGuard threat intelligence. Built on patented Fortinet security processors, they ensure accelerated performance with high throughput, multi-gigabit speeds, and efficient handling of encrypted traffic—eliminating bottlenecks for streaming, surveillance, IoT devices, smart home systems, and bandwidth-intensive applications. Models offer flexible connectivity, including multiple Gigabit or multi-gigabit ports, SD-WAN capabilities, and options for integrated wireless in select series. Professionally installed, Fortinet FortiGate forms a secure, scalable network foundation that safeguards the entire home while delivering reliable speed and visibility—works great with Control4 for an enhanced, protected smart home experience.

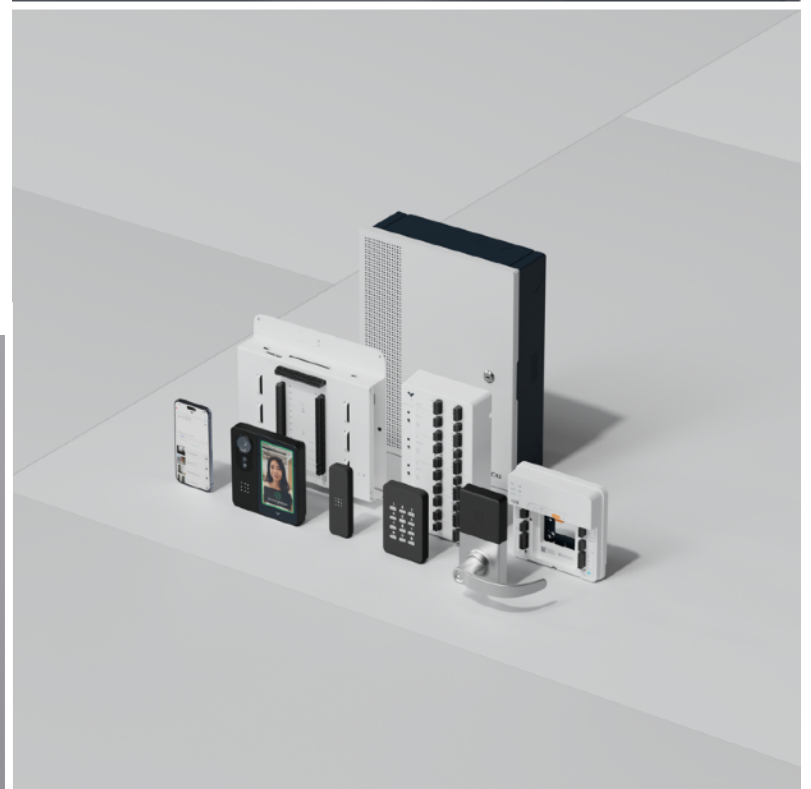

Araknis

Araknis Networks delivers reliable, professional-grade networking solutions designed for smart homes and demanding connected environments. Featuring a full lineup of routers, switches, and access points—including multi-gigabit models, up to 10Gbps throughput, PoE options, and advanced features like VPN support, load balancing, VLANs, and embedded firewalls—these devices provide seamless coverage, high-speed performance, interference mitigation, and support for dense device ecosystems. Built for scalability from basic plug-and-play setups to complex multi-gig installations, Araknis ensures rock-solid connectivity for streaming, surveillance, IoT, smart home systems, and bandwidth-intensive applications. Every device includes OvrC cloud management for easy remote configuration, monitoring, and troubleshooting. Professionally installed, Araknis offers dependable, future-proof infrastructure that eliminates connectivity issues and supports sophisticated connected living—works great with Control4 for an enhanced smart home experience.

Verkada

Verkada delivers modern, enterprise-grade physical security solutions through a unified cloud-managed platform—ideal for high-end homes and businesses seeking sophisticated, reliable protection. Video Surveillance features high-resolution cameras with AI-powered analytics for intelligent search, real-time alerts, people/vehicle detection, and crystal-clear footage day or night. Cameras include onboard storage for reliable recording (up to 365 days in some models), automatic firmware updates, and seamless cloud integration via Verkada Command—no NVRs or servers required. Alarms provide advanced intrusion detection with professional monitoring options, wireless sensors, panels, and proactive notifications, all tied into the same platform for unified response and visibility. Access Control offers scalable door management with multi-format readers (cards, badges, Bluetooth mobile via Verkada Pass app), remote unlocks, automated user provisioning, and real-time video context on access events. This hybrid cloud system ensures effortless scalability, secure encryption, touchless options, detailed activity logs, and no on-premise infrastructure needs. Backed by an industry-leading up to 10-year hardware warranty (depending on model), Verkada provides long-term reliability, automatic updates, and 24/7 support. Professionally installed, Verkada enhances protection, operational efficiency, and peace of mind with intuitive, future-proof security tailored for luxury residences and premium commercial spaces.

AUTHORIZED RESELLER

Luma

Luma Surveillance delivers intuitive, professional-grade video security solutions tailored for high-end homes and businesses, combining robust performance with user-friendly features for reliable peace of mind. This camera system is designed to work seamlessly with Control4, enabling integrated viewing, control, and automation within the unified smart home ecosystem. Featuring a range of high-resolution IP cameras—including bullet, dome, turret, and advanced X20 series models with AI-powered human/vehicle detection, smart tracking (auto pan/tilt/zoom to follow movement), and options like PoE floodlight cameras with active deterrence—Luma provides crystal-clear HD or higher footage, exceptional low-light performance with full-color night vision, and reduced false alerts through intelligent analytics. Paired with powerful NVRs supporting up to multi-channel recording, long-distance PoE, 4K output, and expandable storage, the system offers seamless local recording without cloud dependency concerns. The intuitive Luma View app enables easy live viewing, playback, search, snapshots, push notifications, and remote access from mobile devices or tablets. Professionally installed, Luma Surveillance provides dependable, high-quality monitoring that captures life's important moments while enhancing protection and convenience for luxury residences and premium commercial spaces.

Clara Shades

Clara Shades delivers elegant, motorized smart shades designed for seamless integration into high-end homes and sophisticated spaces. Offering a range of indoor and outdoor solutions—including roller shades, roman shades, sheer curtains, and weather-resistant outdoor bug screens—these shades provide precise light control, privacy, UV protection, glare reduction, and energy efficiency with premium, custom fabrics and contemporary styling. Available in versatile powering options like PoE (Power over Ethernet), Zigbee wireless, wired low-voltage, and battery-powered models, Clara Shades ensure reliable, quiet operation and easy scalability for any project size. Control is effortless via wireless remotes, wall keypads, mobile apps, or voice assistants, with advanced scheduling, grouping, and scene capabilities. This system is designed to work seamlessly with Control4, enabling unified automation, intuitive touchscreen/app control, and personalized scenes that elevate comfort and ambiance throughout the home. Professionally installed, Clara Shades combines timeless design with smart functionality to create responsive, luxurious environments that enhance everyday living in luxury residences and premium settings.

WattBox

WattBox delivers professional-grade power management solutions designed for high-end homes and businesses, providing reliable surge protection, power conditioning, and intelligent control to safeguard and optimize connected systems. Featuring a comprehensive lineup—including IP-controllable power conditioners (such as the 800 and 820 Series with individually metered and controlled outlets), compact Wi-Fi models, in-wall options, rack-mount PDUs, and online double-conversion UPS units—WattBox offers advanced features like self-healing auto-reboot, remote outlet scheduling, real-time power monitoring, voltage/current threshold alerts, and seamless integration with OvrC for cloud-based remote management, troubleshooting, and firmware updates. Built with enterprise-level surge protection (including fireproof MOVs and noise filtration), these solutions eliminate inrush current issues, prevent downtime from power glitches, and ensure uninterrupted performance for AV equipment, networks, surveillance, and smart home devices. This system is designed to work seamlessly with Control4, enabling unified automation, power cycling, and monitoring within the smart home interface. Professionally installed, WattBox provides dependable, future-proof power infrastructure that enhances system reliability, reduces service needs, and delivers peace of mind for luxury residences and premium commercial spaces.
